EDUCATION

Ain Shams University

Bachelor of Computer and Information Science, CGPA: 3.61/4.0

Cairo, Egypt

September 2022 – June 2026

EXPERIENCE

Game Developer Intern

GMind

July 2025 – September 2025

Alexandria, Egypt

- Engineered head motion stabilization system for VR game Plantopia.
- Designed 3+ interactive narrative sequences using Unity Timeline and Cinemachine

Game Developer Intern

Information Technology Institute (ITI)

June 2024 – August 2024

Cairo, Egypt

- Completed 8-week Unity/C# bootcamp covering physics simulation, animation, and collision detection
- Made a 2D platformer with player controls, enemy AI, and progression systems

PROJECTS

Unity Game Projects | GitHub | GitHub

June 2024 – Present

- Published 5+ games across PC and mobile platforms with C# scripting and UI design

Tankers - Multiplayer Game | GitHub

February 2025 – July 2025

- Architected a multiplayer top-down shooter game (Unity/Netcode), implementing and optimizing network synchronization for movement and actions for up to 20 concurrent players

Word to Puzzle Generator | GitHub

March 2025

- Automated puzzle generation tool that cut level design time via single-line input

Road Runner - 2D Mobile Game GitHub

June 2024

- Programmed adaptive difficulty system based on player performance metrics to enhance engagement
- Implemented progression system with 9 unlockable skins to boost retention

Evangelion App Design | Figma

July 2024

- Prototyped mobile Bible app in Figma with 5 engagement features including AI chat and gamification

Metro Mate | GitHub | Figma

May 2024

- Developed C++/Qt navigation app for 50+ station metro network with Dijkstra's algorithm
- Led back-end team and created 20+ screen UI prototype in Figma

Watch It App | GitHub

December 2023

- Launched Java movie database with CLI and JavaFX GUI featuring 20+ search and filtering capabilities

Snake: Apple Quest | GitHub

May 2023

- Coded enemy AI in C++/SFML using vector math for accurate projectile targeting

COURSES

Game Development with Unity, Udemy	January 2024 – Present
AI for Games in Unity, Udemy	June 2025 – Present
Multiplayer Framework with Unity, Udemy	2025
Competitive Programming, Coach Academy	2022
Python Programming, ISTEM	2021
Scratch, Power Academy GitHub	2020

ACTIVITIES

Game Jams

- IPSE – Information Technology Institute (ITI) (February 2026) 1st Place Winner: Co-developed a 30-minute narrative puzzle experience centered around themes of identity. Programmed player interactions, dynamic platform mechanics, and integrated multi-level 3D environments under strict game jam deadlines.s
- GEM Hackathon – Grand Egyptian Museum (December 2025) 3rd Place Winner: Built a gamified app prototype enhancing visitor engagement through guided paths and interactive quests during a 30-hour challenge.
- Player2 NPC Jam (November 2025): Co-developed barista simulator with murder mystery solved through NPC dialogue
- Jamsepticeye (October 2025): Shipped playable prototype in 6 days with 2-person team
- Digitopia (September 2025): Collaborated with 4-person team on Egyptian culture game
- Blender Competition (June 2025): Animated LEGO short film, placed 6th among 50+ teams

MSP Tech Club (Student Activity)

- SFML Workshop (February 2023): Created 2D game demo (GitHub) as teaching resource
- Local Game Jam (March 2024): Delivered complete game in 72-hour sprint
- Hack Your Game CTF (August 2024): Designed security challenge for 80+ participants

RoboTech (Student Activity)

- Media Head (October 2023 – August 2024): Generated graphics and videos for 3+ events

Video Editing

- Edited 2-minute gameplay trailer (Video) showcasing game features with visual effects
- Crafted 25+ social media assets for RoboTech to drive event awareness

TECHNICAL SKILLS

Programming Languages: C++, C#, Python, Java, SQL, PL/SQL, HTML, CSS

Game Development: Unity, C# Scripting, SFML, Gameplay Mechanics, Game Physics, Animation, Performance Optimization, Netcode for GameObjects, VR Development

Tools & Technologies: Git, GitHub, Visual Studio, IntelliJ IDEA, Visual Studio Code, Eclipse, Oracle SQL Developer, Figma, Blender, Linux, Qt

Software: Scene Builder, SolidWorks, Unity Timeline, Cinemachine

LANGUAGES

Arabic: Native | **English:** Fluent | **French:** Elementary
